Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30 DAYS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2142

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claim 24-34 and 39-40, drawn to a processing module (apparatus) for generating an image using an algorithm for determining the level of energy emanating from a source located within a mass, classified in Class 702, subclass 16.

II. Claims 35-38, drawn to a method of implementing an algorithm in a processing module for creating a gate-level netlist to be inserted in a circuitry, classified in Class 716, subclass 16.

2. Inventions I and II are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention I has separate utility such as in a processing module (apparatus) for generating an image using an algorithm for determining the level of energy emanating from a source located within a mass not used in a method of implementing an algorithm in a processing module for creating a gate-level netlist to be inserted in a circuitry as claimed in Group II.

3. Inventions II and I are related as subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In this instant case, invention II has separate utility such as in a method of implementing an algorithm in a processing module for creating a gate-level netlist to be inserted in a circuitry not used in a processing module (apparatus) for generating an image using an algorithm for determining the level of energy emanating from a source located within a mass as claimed in Group I.

4. Also an undue burden would be placed upon examiner since the search for Group I would be in class 702 subclass 16 and such a search is not required for Group II. Also the search for Group II would be in class 716 subclass 16 which is not required for Group I.

5. Because these inventions are distinct for the reasons given above and because they have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter and the search for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

7. The applicant is also advised that the response must be submitted to the Office within 30 calendar days.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert B. Harrell whose telephone number is (703) 305-9692. The examiner can normally be reached Monday thru Friday from 5:30 am to 2:00 pm and on weekends from 6:00 am to 12 noon Eastern Standard Time.

8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack B. Harvey, can be reached on (703) 308-9705. The fax phone numbers for the Group are (703) 746-7238 for After-Final, (703) 746-7239 for Official Papers, and (703) 746-7240 for Non-Official and Draft papers.

10. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-9600.
